

REGISTRATION CERTIFICATE

Animal ID: NMM23U356
 Animal Name: MILLAH MURRAH ULTRAJET U356^{PV}
 NLIS Visual No/RFID: NJ040705XBT05791 / -
 Register: HBR
 Sex: Male
 Date of Birth: 23/07/2023
 Colour: BLACK
 Breed Percentage: AA 100%
 Genetic Conditions: AMF, CAF, DDF, NHF, DWF, MAF, MHF, OHF, OSF, RGF
 Breeder: GOONAMURRAH PASTORAL CO
 Owner: WRI Shepwok Angus 100%

Date Issued:
17-Jun-2025

EXPLANATION OF GENETIC CONDITION CODES

The genetic condition codes indicate the status of an animal for genetic conditions or traits monitored by Angus Australia.

AM	Arthrogryposis Multiplex
CA	Contractural Arachnodactyl
DD	Developmental Duplication
NH	Neuropathic Hydrocephalus
DW	Dwarfism
MA	Alpha Mannosidosis
OH	Oculocutaneous Hypopigmentation
OS	Osteopetrosis
RG	Red Gene
MH	Muscular Hypertrophy (Myostatin)

For each condition, the status of the animal will display as follows:

-- F	Free	Indicates that the sample submitted for the animal has been tested and found to be free of the causative mutation responsible for the condition. This animal is homozygous free.
-- C	Carrier	Indicates that the sample submitted for the animal has been tested and found to be a carrier of the causative mutation responsible for the condition. This animal is heterozygous for the mutation, meaning that it has one mutant allele and one normal allele. This animal could pass the mutation to approximately half of its progeny.
-- FU	Free Untested	Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal is expected to be free of the mutation responsible for the condition but has not been tested . However, this animal has not been tested for the causative mutation and Angus Australia gives no guarantee as the animal's free status.
--- %	Carrier	Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal has a chance of being a carrier of the mutation responsible for the condition but has not been tested . The higher the indicated percentage, the larger the chance the animal may be a carrier. To verify the status of this animal, Angus Australia recommends a test be undertaken prior to using this animal for breeding purposes.

EXPLANATION OF ANIMAL NAME SUFFIX

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV	: both parents have been verified by DNA
SV	: the sire has been verified by DNA
DV	: the dam has been verified by DNA
#	: DNA verification has not been conducted
E	: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively
